DETAILED ACTION

Note: This is in response to an amendment filed 03/24/2008.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 16-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Acosta et al. (U.S. 7,137,993) in view of Heyn et al. (U.S. 5,201,757).

Acosta et al discloses in figures 12A-12D, a method for delivering a plurality of stent segments (162) comprising the steps of positioning a distal portion of the stent delivery catheter (160) with stent segments (162) disposed within its lumen; moving a sheath (164) to deploy a first selected number of the stent segments (118) at a first treatment site; repositioning the stent delivery catheter (160) to a second treatment site to delivery a second selected number of the stent segments (162) which spaced apart from the first treatment site, wherein the first selected number is different than the second selected number; wherein a balloon (170) causes the first and second selected stent segments (162) to expand at different treatment sites. Acosta et al does not disclosed the catheter device (160) having first and second sheaths disposed thereon. However, Heyn et al. teaches in figures 4 and 5 that it is known in the surgical art to use first and second sheaths (20,30) for deployment of a stent.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Acosta et al's single sheath with first and second sheaths as taught by Heyn et al in order to permit radial expansion of the stent only over its medial region while the sheaths continue to contain the axially outward regions of the stent.

Response to Arguments

3. Applicant's arguments filed 03/24/2008 have been fully considered but they are not persuasive. Applicant argued that Acosta is disqualified as prior art under 103 rejection due to its filling date on 04/10/2003 which is less than 1 year before the 10/14/2003 filling date of the present application. The examiner is not convinced due to the effective filling date of Acosta 03/13/2002 (provisional application No. 60/364,389) which is more than 1 year before the 10/14/2003 filling dates of the present application. For this reason, Acosta is qualified as prior art under 103 rejection.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
